

# Setting up iWatch DVR on PCs

---

April 27, 2017

Firstly, go to the address of your DVR in Internet Explorer i.e. host.i-dvr.net. Then, when prompted, log in with the credentials for the DVR, by default these are; Username: admin, Password: 123456. You should then see the below screen:

Now simply click on the second link down to download iWatch for Windows. Open the download and you will see the below screen. You will then need to populate it with the information for your DVR. An example is shown below:
