

Setting the Constant Record Schedule for the Vistron

January 27, 2017

Firstly, log into the Vistron DVR. Then right click
and choose Main Menu → Setup → Storage → Record.

You should then see the below screen or similar depending on your current schedule:

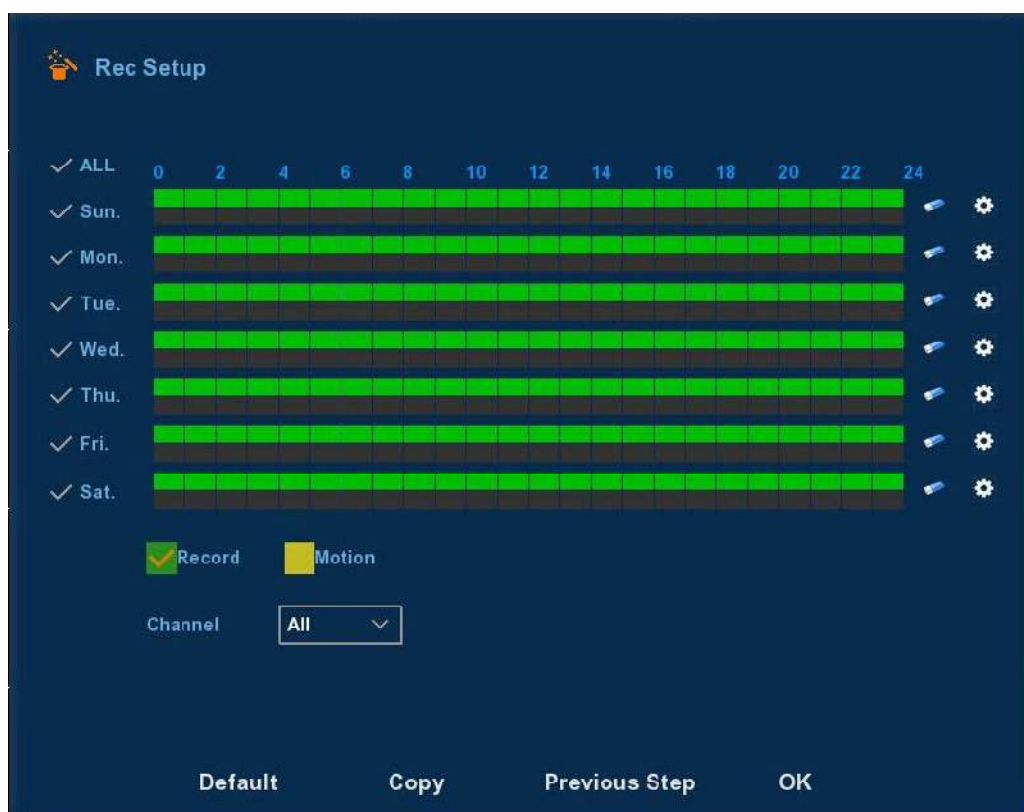

January 27, 2017

The above example shows a motion record schedule. To set this up for constant record you will need to firstly **remove all the yellow boxes** for the days you wish to change.

To remove the constant record schedule select all the days by ticking the **'All' tick** at the top of the page and then **click the eraser icon** on the right hand side. You should be left with an empty schedule now.

Once you have done this **tick the green record box** at the bottom of the screen and then **click and drag** (still with all the days selected) along the bottom half of the two boxes available. You should now be left with the below schedule:

The screenshot shows the 'Rec Setup' window with a dark blue background. At the top left is a small icon of a camera and the text 'Rec Setup'. Below this is a list of days with checkboxes: 'ALL', 'Sun.', 'Mon.', 'Tue.', 'Wed.', 'Thu.', 'Fri.', and 'Sat.'. All checkboxes are checked. To the right of the days is a grid of 24 columns (0 to 24) and 7 rows (Sun. to Sat.). The grid is filled with green boxes, indicating a constant record schedule. To the right of the grid are two columns of icons: a blue eraser icon and a gear icon. Below the grid are two checkboxes: 'Record' (checked) and 'Motion' (unchecked). Below these is a 'Channel' dropdown menu with 'All' selected. At the bottom are four buttons: 'Default', 'Copy', 'Previous Step', and 'OK'.

Once you have done this simply click **"Save"** and this will apply your settings immediately.

If you need to adjust this for all channels then please ensure you have selected the 'All' in the channel section as shown above.

Your system is now configured for constant record!
